

Press Release, 26 February 2014

Another UK company awarded Ferrybridge Multifuel contract

As construction progresses on the new Ferrybridge Multifuel power station, the main contractor, Hitachi Zosen Inova (HZI), has awarded the electrical installation contract work to a Derbyshire-based company, HCM Electrical Ltd.

HZI is the Principal Contractor for Multifuel Energy Limited (MEL), a joint venture project company between SSE (owners of the Ferrybridge “C” Power Station) and Wheelabrator Technologies.

HZI originally awarded the electrical contract work to NATUS. Natus is an independent medium-sized German company that specializes in providing integrated electro-technical solutions. Ralf Simons, Head of Sales at NATUS said: “We always work with local companies to provide the best expertise on-site”. NATUS have chosen to subcontract a major share of the installation work to HCM Electrical Limited, a UK company based in Codnor, Derbyshire. HCM has over 15 years experience in the industry and are expected to start the electrical work at the Ferrybridge Multifuel 1 project towards the end of February 2014 and this work is expected to continue until summer 2014. Around 25 people will be employed on site, with the aim of hiring as many locally based, suitably qualified workers as possible.

John Cooper from HCM Electrical Limited said: “We are delighted to have been awarded the electrical installation contract for such a large scale project that is being built so close to our headquarters in Derbyshire. We look forward to getting started on site and using the experience that we have to complete the job to the highest of standards.”

During construction of the Ferrybridge Multifuel power station, HZI aims to subcontract work to local and UK companies wherever possible, integrating local services and suppliers into the project’s construction. For any enquires related to the electrical installation contract, please contact HCM Electrical Ltd directly at mick@hcm-electrical.co.uk.

Notes to Editor

About HCM

HCM is an electrical and mechanical contracting company established 25 years ago and has over 20 years experience working on power stations. HCM specialise in new installations contract maintenance and rapid response breakdown work. HCM are pleased to add HZI and Natus to their customer base which already includes many blue chip companies.

About NATUS GmbH & Co.KG

NATUS GmbH & Co.KG is one of the leading global providers of integrated electrotechnical solutions with their headquarters in Trier, Germany. As an expert in the field of safe power distribution, the company serves as a reliable partner to industry, plant construction and

power suppliers. NATUS products and services range from state -of-the art medium and low voltage systems to plant and process automation, control systems and service, right through to electrotechnical turnkey solutions. Founded in 1956, NATUS now employs around 600 people. To find out more, please visit www.natus.de

About Hitachi Zosen Inova

Zurich-based Hitachi Zosen Inova (HZI) is a global leader in energy from waste (EfW), operating as part of the Hitachi Zosen Corporation Group. Formed from the former Von Roll Inova, HZI acts as an engineering, procurement and construction (EPC) contractor delivering complete turnkey plants and system solutions for energy recovery from waste. HZI's solutions are based on efficient and environmentally sound technology, are thoroughly tested, can be flexibly adapted to user requirements, and cover the entire plant life cycle. The company's customers range from experienced waste management companies to up-and-coming partners in new markets worldwide. HZI's innovative and reliable waste and flue gas treatment solutions have been part of some 500 reference projects delivered since 1933. To find out more, please visit www.hz-inova.com

About SSE plc

SSE is one the UK's largest generators of electricity with over 13,000 MW of generation capacity in total (UK and Ireland) from the most diverse portfolio of power stations. It is the leading generator of electricity from renewable resources with a total generation capacity of over 3,200MW. Through its renewable development division, SSE Renewables, it is involved in the development of new renewable energy projects covering wind, wave, tide, and hydro electricity.

About Wheelabrator Technologies

Wheelabrator Technologies (WTI) is a leading developer, owner and operator of Energy from Waste (EfW) facilities and has been established for over 37 years. WTI currently owns and/or operates 21 energy facilities in the US, 17 of which are EfW facilities.

Every year in the US, WTI processes more than 6.9 million tonnes of waste which generates over 4.5 billion kilowatts of energy.

Wheelabrator Technologies Inc. is a wholly owned subsidiary of Waste Management Inc., the largest provider of integrated waste management services in North America, with 20 million customers. In 2012 and 2013, Waste Management was named in Ethisphere's annual World's Most Ethical Companies list. It was the only company listed in the 'environmental services and equipment' category. The Ethisphere Institute is a leading international think-tank dedicated to the promotion of best practices in business ethics, corporate social responsibility, anti-corruption and sustainability.
